

## LED DISPLAY FOR PIXEL ART SUPER PIXEL QUICK START GUIDE

**Step 1: Pair SUPER PIXEL using Bluetooth to your Android device.  
PIXEL will appear in Bluetooth settings as "PIXEL".  
Use pairing code: 0000**

**Step 2: Download one of PIXEL's free apps by searching "ledpixelart" from Google Play or download from <http://ledpixelart.com/apps>. Apps are available for Android, PC, Mac (USB mode only), and Raspberry Pi.**

**Note: When using the PIXEL:LED ART Android app, short tap to stream an animation and long tap to write to PIXEL's onboard storage for stand alone operation.**

**IMPORTANT: By default, PIXEL's apps will default to the smaller 32x32 LED Matrix. When you first run one of PIXEL's apps, go into the settings of that app and change the LED Matrix to SUPER PIXEL(64x64) and then re-start the app.**

**IMPORTANT: PIXEL's front panels are acrylic and can scratch. Please be careful when handling and use the included microfiber cloth to clean.**
